IN THE CLAIMS:

Please amend the claims as follows:

B<sup>1</sup> 1. (Twice Amended) A piste-maintenance tracklaying vehicle comprising an internal  
2 combustion engine which is drivingly connected, [preferably] via a gear, to a drive sprocket of  
3 [each] at least one track, and accessory drives for additional devices that are mountable on said  
4 tracklaying vehicle, [such as rotary snow plow, front snow blower, or the like, ]and/or for  
5 vehicle components, such as a tilting device for platform and driver's cab or track tensioner,  
6 with an internal combustion engine being connected via a generator and at least one electric  
7 motor and [possibly] a gear to each drive sprocket, and in overrun mode [said] an electric  
8 motor being switchable as a current generator for accessory drives designed as electrohydraulic  
9 or electric drives, wherein at least said electric drive for a shaft of said rotary snow plow is  
10 synchronized with the electric motor of said drive sprocket.

B<sup>2</sup> 1 3. (Twice Amended) The tracklaying vehicle according to claim 1, wherein a planetary *beyond cl 1*  
2 gear is arranged between electric motor and drive sprocket[, and a steering gear is arranged in  
3 the case of only one electric motor for the drive sprocket of both tracks]. *67?*
